

LOW PRESSURE COPPER WARRANTY

Due to localised water conditions in the Hastings district, Rheem New Zealand advise that any of our Low Pressure Copper hot water cylinders are NOT suitable for installation in the postcode areas of 4120 and 4122. These cylinders are outside of our Rheem Warranty water chemistry terms, based upon recent testing and may result in subsequent pinhole corrosion. We recommend our Rheem Vitreous Enamel or Stainless Steel cylinders for installation in these areas assuming localised conditions remain as per the recent water testing. Should you have any questions, please contact Customer Services on 0800 657 336.
